

WELCOME TO THE

Outpatient Program

What is outpatient treatment?

We have created a program to help those clients who have addiction issues but cannot be away from their families for an extended period of time. As a client in our outpatient program you will receive evidence based treatment offered in a professional setting facilitated by a certified addiction counsellor.

Who is this for?

Our outpatient program is designed for absolutely anyone seeking addiction treatment.

When can I start?

We offer continuous intake every Monday.

How long is it?

42 days spread over 14 weeks
Which means its 3 days a week from 10am - 4pm.

How can I apply?

We have made it easy to seek treatment, just fill out the registration package and our intake will look after the rest. Visit www.kapown.ca or call 1-888-751-3921

What will happen after I register?

Once the registration package is completed we would like to meet with you to go over the information in the package. This is usually done the week before you start.
